EGGER Worktops

As versatile as life

Decorative Collection 26+

Make the kitchen eye-catching

EGGER products facilitate outstanding kitchen designs. In this brochure, you can find out more about our decors, the various worktop models and perfectly coordinated accessories. Be inspired!

→ More information about the products shown click here

All our shown and mentioned decors are reproductions.

Design that inspires

EGGER Worktops based on laminate surfaces or compact laminates are the highlight in any kitchen. Benefit from great design flexibility when planning your kitchen thanks to our wide range of decors, from white tones and uni colours to authentic wood and material reproductions. The texture, which is perfectly matched to the respective decor, gives the worktop a special naturalness and a pleasantly warm feel and quality.

Versatility that inspires

EGGER Worktops are food-safe, have an antibacterial surface property and are abrasion, impact and scratch resistant. They are easy to clean and require no additional care products. Thanks to their attractive price and wide range of design possibilities, they are the ideal material for use as table tops, in shopfitting or hobby rooms, for example.

- Wear-resistant
- Impact- and scratch-resistant
- Hygienic
- Lightfast
- Food-safe
- Stain-resistant
- Moisture-resistant
- Antibacterial surface properties
  according to ISO 22196
  (= JIS Z 2801)

Please refer to the technical data sheets in the product specific download area for detailed information on the product characteristics mentioned and their reference to the standard EN 438:

Design trends in kitchen design

Open interior design

The role of the kitchen is changing. There is an increasing desire for open living spaces that are visually harmonised and allow for multifunctional living. Corridors, or hallways, are being eliminated in favour of a larger living space. Small floor plans no longer seem cramped and fewer walls give the eye more space. The kitchen becomes the centre of attention and is a hub for exchange and communication.

All our shown and mentioned decors are reproductions.

Monolithic optics

A monolith is a naturally formed or shaped block of rock. This look gives the kitchen a very modern appearance. Combining the worktop, fronts and side panels in a single decor creates this monolithic look.
The result is a compact, monolithic optic.

Thin worktops for a particularly modern look

Thin worktops are enjoying increasing popularity thanks to their minimalist and straightforward look.

Organic shapes

Organic shapes are increasingly finding their way into kitchen design. They appear pleasantly soft and harmonious, creating an inviting living atmosphere. The use of round tables, curved kitchen islands and rounded furniture increases freedom of movement and makes the room appear more open and spacious.

Handleless fronts

If a minimalist, modern kitchen design is desired, handleless fronts are the perfect choice. In this case, handle strips or special fittings, that open the pull-outs with light pressure replace the otherwise visible handles.
The result is a luxurious kitchen with a clear-cut look.

Kitchen fronts from matt to high-gloss

Matt or high-gloss surfaces enhance the kitchen. Our PerfectSense Matt Lacquered Boards and Laminates not only offer an elegant look, but also practical anti-fingerprint properties. They create a unique sense of space that is both tactile and visually appealing. Our high-gloss PerfectSense Gloss Lacquered MDF provide a touch of luxury and add more depth to the room.

NEW WORKTOP MODEL

EGGER PerfectSense® Ambiance Square Edged Worktops

The 20 mm thick EGGER PerfectSense Ambiance Square Edged Worktops impress with their coordinated textured lacquer surface. The matt-gloss effect is perfectly matched to the marble or granite decor.

YOUR ADVANTAGES

- Synchronised lacquer surface texture with matt-gloss effect
- Particularly authentic decor impression
- Lighter weight and warmer to the touch than stone or marble worktops
- Simpler machining and processing, e.g. for cut-outs and trims
- Serves the trend for modern, thin worktops

NEW WORKTOP MODEL

EGGER Square Edged Worktops

EGGER Square Edged Worktops are only 20 mm thick and are made from laminated particleboard. They fulfil the need for thin worktops and offer the visual lightness of kitchen design.

YOUR ADVANTAGES

- Attractively priced alternative to natural stone worktops
- Lighter weight and warmer to the touch than stone or marble worktops
- Simpler machining and processing, e.g. for cut-outs and trims
- Serves the trend for modern, thin worktops

EGGER Feelwood® Square Edged Worktops

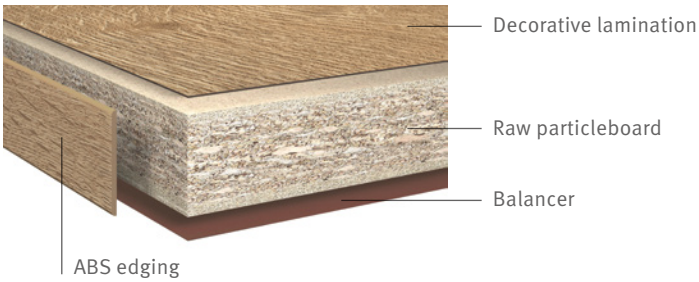
The 38 mm thick Feelwood Worktops get their natural look from the texture that runs synchronously with the decor image. The front long side is edged with 1.5 mm ABS edging in the same decor. A temperature and steam resistant PUR hot-melt adhesive is used.

Matching end-grain edges that are additionally available for the short ends can be applied to create an overall appearance that can hardly be distinguished from solid wood.

YOUR ADVANTAGES

- Particularly natural-looking wood reproductions thanks to synchronised pore surfaces
- Less maintenance compared to solid wood worktops
- Modern design thanks to clear lines

Product structure



Product	Format	Available
Feelwood Worktop Mod. 100/1.5 edged on one side	4,100 × 650 × 38 mm	from stock

EGGER PerfectSense® Matt Square Edged Worktops

PerfectSense Matt Square Edged Worktops are characterised by their super-matt look, pleasant feel and anti-fingerprint properties. A 38 mm thick particleboard is used as the core board.

The front longitudinal edge is realised with a 1.5 mm thick ABS edge that perfectly matches the decor. A temperature- and steam-resistant PUR hot-melt adhesive is used. With this worktop, you can fulfil the trend for matt surfaces.

YOUR ADVANTAGES

- Super-matt, pleasantly tactile lacquer surface
- Anti-fingerprint properties
- Enables impressive matt kitchen designs in combination with PerfectSense Lacquered Boards and Edging

EGGER Postforming Worktops

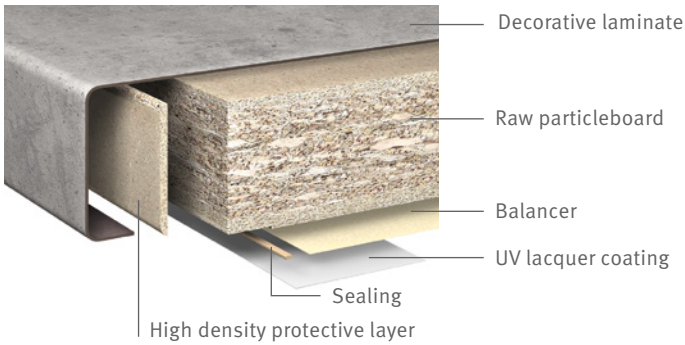
EGGER Postforming Worktops in 38 mm thickness are the established and classic solution. Their enduring appeal is down to the lack of a joint, owing to the top surface continuing over the radii and underneath. On the front longitudinal edge, the thin particleboard support edge ensures improved surface calm.

YOUR ADVANTAGES

- Classic worktop design
- Warmer feel compared to worktops made of natural stone
- Less maintenance compared to solid wood worktops
- Perfectly matched textures

Product structure



Product	Format	Available
Postforming Worktop Mod. 300/3 postforming edge on one side	4,100 × 600 × 38 mm	from stock
Postforming Worktop Mod. 300/3 postforming edge on both sides	4,100 × 920 × 38 mm	
Postforming Worktop Mod. 300/3 postforming edge on both sides	4,100 × 1,200 × 38 mm	
Splashback	4,100 × 640 × 8 mm	

Accessories » more from page 62	Format / Details	Available
Laminates in Variable Length	1,000 – 6,000 × 1,310 × 0.6 mm	from stock
Laminates	3,050 × 1,310 × 0.8 mm

EGGER Splashbacks

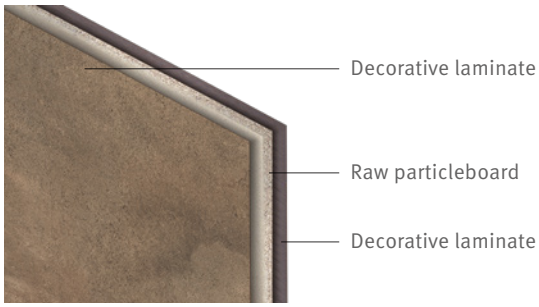
Splashbacks give the kitchen a modern, attractive look. They are ideal as splashbacks behind the hob or sink and are available from stock in all worktop decors in the format 4,100 × 640 × 8 mm.

Go to Splashbacks

Product structure



YOUR ADVANTAGES

- Splash protection resistant to abrasion, impact and scratches
- Available in the same decor and texture as the worktop
- Ideal for covering an existing tiled splashback area
- Easier to process than glass, for example

EGGER Worktop Accessories

Perfectly matched to EGGER Worktops, you can obtain further products for customised additions and installation.

Laminates

Laminates in the format 2,800 × 1,310 mm are also available for all worktop decors. They are the ideal solution for horizontal and vertical surfaces with medium to high loads, as well as for curved or rounded kitchen furniture.

Go to Laminates

Laminates in Variable Length

For all Postforming, PerfectSense and the 20 mm thin Square Edged Worktops, you can obtain laminate in the same decor and texture in variable lengths between 1,000 and 6,000 mm, increasing in 1 mm increments. This means you can produce decorative flanks, tables or fronts on both sides yourself.

Go to Laminates in Variable Length

ABS Edging

For Postforming, Feelwood, PerfectSense and Square Edged Worktops, we offer from stock an edging solution perfectly matched to the decor. For Feelwood Worktops, you also receive ABS edging with an end-grain look. The decor reference for these accent edges starts with a “Q”. Compact Laminate Worktops do not require additional edging.

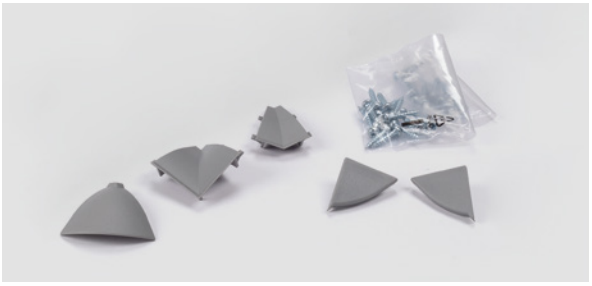
Go to ABS Edging

Worktop Wall Profiles

For all Postforming and Feelwood Worktops, we offer matching worktop wall profiles in the format 4,100 × 25 × 25 mm, individually wrapped in foil. They enable a flush finish to the wall, e.g. in the case of irregular joints or existing tiles on the rear wall.

Worktop Wall Profile Accessories Set

The worktop wall profiles accessory set available from stock includes internal and external corners, end caps and screws.



Worktop Connectors

The 12 and 20 mm thin worktops require the use of special fittings. These connectors, matched to both worktop thicknesses, are available from stock, are easy to install and ensure a secure worktop connection.

Sealing for Corner Joints

The sealing protects the corner joint against the penetration of moisture. It is available in white, grey, brown and black.

Cleaning recommendations for EGGER surfaces

EGGER surfaces do not require any special care thanks to their hygienic, easy-to-clean and dense surface. This also applies to our super-matt, lacquer-based PerfectSense surfaces, which are less susceptible to fingerprints thanks to their anti-fingerprint property. However, to maintain this property and the matt appearance, regular cleaning is important here too.

Cleaning properly

- Clean the surfaces regularly
- Remove grease residues and liquids immediately
- Use clean, soft paper or cotton cloths
- Use conventional glass cleaner, warm water with neutral detergent without re-greasing ingredients
- If necessary test the cleaning agent on a non-visible or barely visible area of the surface
- Always clean parallel to the surface texture
- When cleaning edging, quickly wipe up the cleaning agent again without allowing exposure time
- Depending on the result, repeat the cleaning process
- Rinse with clean, warm water

Streaks are usually caused by cleaning with organic solvents, the use of cold water, cloths used multiple times or chamois leather. For a streak-free result, always wipe with warm water and then dry the surface with a clean, soft cloth.

PLEASE NOTE

- In general, do not use polishes, waxes, furniture cleaners, re-greasing cleaners / plastic cleaners or bleach
- Do not use abrasive or scouring agents such as scouring powder or steel wool
- Do not use cleaning products which contain strong acids or strong acidic salts (e.g. descaler, drain cleaner, hydrochloric acid, silver polish or oven cleaner)
- Do not use steam cleaners

For long-lasting beautiful worktops

Worktops should generally not be used as a surface for cutting, as knife cuts can leave cut marks. **Always use a chopping board.**

Do not place hot cookware such as pots, pans, etc., directly from the hob or oven on the surfaces, as a change in gloss or surface damage may occur depending on the heat exposure. **Always use heat protection.**

Always wipe up spilled liquids immediately, as prolonged exposure to certain substances can cause changes in the gloss level of surfaces.
