

MORE FROM WOOD

Decor variety meets functionality

EGGER Thin Lacquered HDF

Rear wall folding systems

With our foldable back panels - regardless of which system you choose - you enjoy the advantage of packing the back panel and furniture body in a single packaging unit. Our

double-folding option saves an enormous amount of space during packaging.

PU folding system (hot-melt adhesive)

With this folding system, the decor is on the inside.

Tape folding system

With this folding system, the decor is on the outside.

EGGER Thin Lacquered HDF E1E05 TSCA are high-density fibreboards with a uniform surface and a water-based lacquer finish. The large selection of decorative lacquers and innovative folding systems mean that there is a wide range of applications in furniture and interior design.

Benefits

- Innovative folding systems allow for easy handling and assembly
- Folding offers enormous space savings when packaged
- Finishing options through drilling, notching and CNC

Characteristics

- Different decors possible on the top and underside
- Our paint system fulfils the requirements of the TA-Luft and the Chemicals Prohibition Ordinance
- Fulfils the formaldehyde classes/standard requirements of the E1E05 regulation in Germany and the TSCA regulation in the USA

Decor variety

An exclusive selection of decors is available to our customers for Thin Lacquered HDF. We adjust the decor you require to our decors, but also to your templates.
