EGGER

Door Manufacturer Program

EGGER Decorative Collection

Create Timeless & Traditional or Sleek & Modern Doors **with the EGGER Decorative Collection**

Whether your project calls for classic 5-piece, wrapped 3DL or modern slab doors, EGGER's trend-forward decors can complete the look, from surface to edge, for any kitchen, bath or storage design.

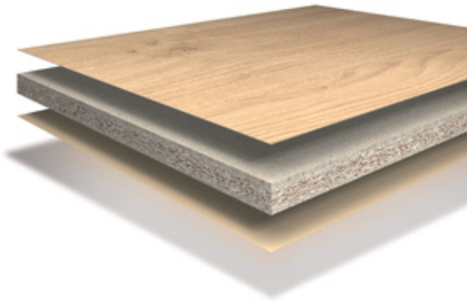

Depending on the desired style, these doors can be fabricated with our Eurodekor TFL panels or PerfectSense Lacquered Boards, together with our matching edge banding and complementary door mouldings, or 3D Laminates from our partner suppliers. Through our Door Manufacturer Program, you can order pre-fabricated doors featuring our decors in 5-piece, wrapped 3DL and slab styles from our trusted partners (see page 7).

Eurodekor TFL Particleboard

Thermally fused laminate (TFL) serves as an excellent wood-based solution for cabinet doors and frames. As a finished panel, it delivers significant material and labor cost savings versus laminates, which require application to a substrate, or veneers, which require finishing.

Our Eurodekor TFL is produced by fusing resin-impregnated decorative paper onto both sides of our high-quality Eurospan Particleboard. Heat and pressure activate the resin, providing a decorative surface that is nonporous, hygienic and won't peel away.

Decor Match System

We make your life easier by offering a comprehensive one-stop solution for decorative surfaces. Our decors span across an integrated range of surfaces, with a **matching line of TFL, laminates and edge banding,** all manufactured directly by us, for an ideal match in surface color and texture, allowing you to carry the same finish from cabinets to countertops and more.

To round out our decorative surface offerings and provide you with maximum flexibility, we work with trusted partners to offer complementary 3D Laminates and 5-piece door mouldings for many of the decors in the EGGER Decorative Collection (see page 6).

Door Styles & Types

Shaker-Style 5-Piece TFL Door (Frame and Panel Door)

Fabricated with Eurodekor TFL and matching edge banding, this traditional style 5-piece door delivers timeless craftsmanship and an impeccable match in color, pattern and texture. The doors are fabricated with a ¼" TFL center panel and ¾" TFL rails and stiles. All materials are manufactured directly by us for the best possible match in color and texture.

TFL Panel with Applied MDF Mouldings

This style of 5-piece door offers diverse profiles with soft, seamless edges. Doors are fabricated by applying 3D Laminate-wrapped MDF mouldings to a ¼" thick Eurodekor TFL center panel. Multi-directional grain patterns and matching woodgrain on the back deliver a convincing real wood look. Working with trusted partners, we have developed complementary MDF door mouldings for 16 decors from the EGGER Decorative Collection.

Wrapped 3D Laminate Doors

This seamless fabrication method mimics the look of a 5-piece door, with just one MDF panel. A door profile is routered out on the raw side of the MDF, then vacuum pressed with 3D Laminate to completely cover the panel. This process seals the edges, with no need for edge banding. Limitless profile varieties are possible, including raised or flat center panels and square or arched frames. Our partner companies offer complementary 3D Laminates for 64 EGGER decors, for an ideal match between doors and other surfaces fabricated with our matching TFL or laminates and edge banding.

TFL and Lacquered Board Slab Doors

Modern, European-style slab doors are easily fabricated with our Eurodekor TFL or PerfectSense Lacquered Boards and ideally matched edge banding. This style of door can be created with any of the decors in the EGGER Decorative Collection, including our authentic embossed-in-register (EIR) woodgrain reproductions, ultra-matte solids and material reproductions. For solid color slab doors, our painting grade TFL and edge banding provide a cost-effective and versatile option by offering a surface suitable for lacquering—delivering maximum flexibility for any design vision.

Complementary Products Partners

Our trusted partners offer complementary 3D Laminates and 5-piece door mouldings for many of the decors in the EGGER Decorative Collection. Download our availability guide at egger.com/availability for full details.
