

Code SDS_OSB_Flammex_en_EU
Version 1
Release Date 18/03/2025

Safety Data Sheet

EGGER OSB Flammex

According to Regulation (EC) No 1907/2008 (REACH)

This product is not hazardous in the form in which it is shipped by the manufacturer, but may become hazardous by wood dust generating downstream activities (e.g. grinding, sanding, cutting or pulverizing).

Section 1: Identification of the substance/mixture and the company/undertaking

1.1 Product Identifier

Trade name	EGGER OSB Flammex
Product description	EGGER OSB Flammex is a multi-layer board made of long, aligned wood chips, which is equipped with a fire protection coating and is used in wood construction and finishing.

1.2 Relevant identified uses of the substance or mixture and uses advised against

Recommended use	Construction
-----------------	--------------

1.3 Details of the supplier of the Safety Data Sheet

Manufacturer/Supplier/Importer	Fritz EGGER GmbH & Co. OG (group)
Regional Support Centre	EGGER Holzwerkstoffe Wismar GmbH & Co. OG Am Haffeld 1 23970 Wismar

Additional Information	SC EGGER Romania SRL Str. Austriei 2 PO Box 38 725400 Radauti environment@egger.com
------------------------	--

1.4 Emergency phone number

1-800-424-9300 / +1 703-527-3887 (Chemtrec)

Section 2: Hazards identification

2.1 Classification of the substance or mixture

EU-OSHA	This product is generally an article and not hazardous, but is regulated under EU-OSHA for the release of wood dust during downstream activities, like grinding, sanding, cutting and sawing.
---------	---

2.2 Label elements

Hazard pictograms	
Signal word	void
Hazard statements	The following statements refer to dust generating downstream activities

Precautionary statements	May form combustible dust concentrations in air
	H315 Causes skin irritation
	H317 May cause an allergic skin reaction
	H320 Causes eye irritation
	H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled
	H335 May cause respiratory irritation
	H350 May cause cancer (inhalation)
	H373 Causes damage to organs through prolonged or repeated exposure (inhalation)
	P202 Do not handle until all safety precautions have been read and understood
	P210 Keep away from heat/sparks/open flames/hot surfaces – no smoking
	P260 Do not breathe dust
	P271 Use only outdoors or in a well-ventilated area
	P280 Wear protective gloves/protective clothing/eye protection
	P302+P352+P305+P351+P338 On contact: Wash thoroughly with water
	P308+P337+P314+P340+ P264 If exposed or concerned: Get medical advice/attention if you feel unwell, move to fresh air

2.3 Other hazards

Results of PBT and vPvB assessment

PBT

Not applicable

vPvB

Not applicable

EU-OSHA

This product is not considered hazardous under the U.S. OSHA 29 CFR 1910.1200 Hazard Communication Standard in the form in which it is shipped, but may become hazardous by wood dust generating downstream activities (e.g. grinding, sanding, cutting or pulverizing).

Section 3: Composition/information on ingredients

3.2 Chemical characterization: Mixtures (article)

Description

The products are composed of wood and cured resins (polymer). See Section 8 for exposure limits discussion.

*Wood contains trace amounts of various chemicals present in the environment, which are absorbed by trees through natural growth. A comprehensive listing of species is available upon request.

Section 4: First aid measures

4.1 Description of first aid measures

General information

No special measures required regarding the product in the form it is shipped, downstream activities like cutting, sawing or grinding can generate dust. To avoid health hazards while these downstream activities, take note of the following measures:

Inhalation

If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing.

Skin

Wash with plenty of soap and water. If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash before reuse.

Eye

Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Ingestion

Rinse mouth thoroughly with water. Get medical attention if you feel unwell and contact a poison control center or medical professional.

4.2 Most important symptoms and effects, both acute and delayed

Refer to Section 11 – Toxicological Information

4.3 Indication of any immediate medical attention and special treatment needed

No further relevant information available

Section 5: Firefighting measures

5.1 Extinguishing media

Use firefighting measures that suit the environment

Water

Fire-extinguishing powder

Carbon dioxide

Foam

5.2 Special hazards arising from the substance or mixture

OSB is a combustible material. If involved in a fire, product will burn.

OSB is not an explosion hazard. Sawing, sanding, or machining OSB can result in the by-product wood dust. Wood dust may present a strong to severe explosion hazard if a dust cloud contacts an ignition source.

Airborne concentrations of 15 grams per cubic meter are often used as the lower explosive limit (LEL) for wood dusts.

In case of fire, the following gases can be released:

Carbon dioxide (CO₂), Carbon monoxide (CO), Oxides of Nitrogen and other hazardous gases and particles

5.3 Advice for firefighters

Protective equipment

Mouth respiratory protective device

Additional information

Prevent formation of dust

Dispose of fire debris and contaminated firefighting water in accordance with official regulations.

Section 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Personal Precautions

Do not breathe dust.

Emergency Procedures

No emergency procedures are expected to be necessary if material is used under ordinary conditions as recommended.

6.2 Environment precautions

No special measures required

6.3 Methods and material for containment and cleaning up

Not applicable for product in purchased form. Dust generated from sawing, sanding, drilling or routing this product may be vacuumed or shoveled for recovery or disposal. Wood dust clean-up and disposal activities should be accomplished in a manner to minimize of airborne dust.

Dispose of the material collected according to regulations

6.4 Reference to other sections

See Section 7 for information on safe handling

See Section 8 for information on personal protection equipment

See Section 13 for disposal information

Section 7: Handling and storage

7.1 Precautions for safe handling

Use good safety and industrial hygiene practices. Minimize dust generation and accumulation. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Wear a respiratory mask if using hand tools without a dust extraction device. Observe all liability insurance association regulations for commercial processing operations (e.g. safety goggles).

Information on protection against explosions and fires:

Avoid formation of dust

7.2 Conditions for safe storage, including any incompatibilities

Storage

No special precautions for handling product. Use good safety and industrial hygiene practices. Minimize dust generation and accumulation. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Keep away from ignition sources

7.3 Specific end use(s)

No further relevant information available

Section 8: Exposure controls/personal protection

8.1 Control parameters

Wood dust needs to be controlled while cutting, sawing, drilling or other dust generating processes are performed.

8.2 Exposure controls

	Result	COSHH	COSHH
Wood dust	WEL	3mg/m ³ Hardwood dust long term exposure limit	5mg/m ³ Softwood dust long term exposure limit
Formaldehyde (50-00-0)	WEL	2,5mg/m ³ long term exposure limit 2,5mg/m ³ short term exposure limit	

Engineering measures/ controls

Adequate ventilation systems as needed to control concentrations of airborne contaminants below applicable threshold limit values. Due to the explosive potential of wood dust when suspended in air, precautions should be taken during sanding, sawing or machining of wood products to prevent sparks or other ignition sources in ventilation equipment. Use of totally enclosed motors is recommended.

Personal Protective Equipment
Pictograms

Respiratory

Use of a NIOSH/MSHA approved dust respirator is recommended where airborne dust levels exceed appropriate PELs and TLVs

Eye/Face

Wear safety glasses

Hands

Wear protective gloves Rubberized cloth, canvas or leather gloves

Skin/Body

Wear long sleeves and/or protective coveralls.

General Industrial Hygiene Considerations

Practice good housekeeping and avoid creating/breathing dust. Do not allow dust to collect. Maintain, clean, and fit test respirators in accordance with OSHA

Environmental Exposure Controls

regulations.

No data available

Section 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

Physical State	Solid	Evaporation rate	Not relevant
Color	Varies	Partitions coefficient	Not relevant
Fire behaviour	Not relevant	Autoignition	No data available
Odor	No distinctive odor	Decomposition temperature	No data available
Vapor Pressure	Not relevant	Viscosity	No data available
Odor threshold	Not relevant	Burning time	No data available
Vapor density	Not relevant	Density	$\geq 600 \text{ kg/m}^3$
pH	Not relevant	Oxidizing properties	No data available
Relative density	Not relevant	Explosive limits	No data available
Melting point	Not relevant	Flash point	Not relevant
Freezing point	Not relevant	Boiling point	Not relevant
Solubility	Not soluble in water		

9.2 Other information

No further relevant information available.

Section 10: Stability and reactivity

10.1 Reactivity

The product is not reactive under normal conditions of use, storage and transport.

10.2 Chemical stability

Stable under recommended storage conditions

Conditions to be avoided: No decomposition if used according to specifications

10.3 Possibility of hazardous reactions

No dangerous reactions known

10.4 Conditions to avoid

Exposure to water, ignition source, high relative humidity and high temperature

10.5 Incompatible materials

Incompatible Materials: acids(strong), Oxidizers(strong)

10.6 Hazardous decomposition products

Hazardous decomposition may occur thermal and/or thermal oxidative decomposition can produce irritating and toxic fumes and gases.

Section 11: Toxicological information

11.1 Information on toxicological effects

Other Material Not applicable for product in purchased from. Individual component information is provided below if available

Components

Formaldehyde 50-00-0 Acute Toxicity: Ingestion/Oral Rat LD50 >200mg/kg; Inhalation Rat LD50 0.578mg/l/4h

Potential Health Effects

No adverse health effects expected if the product is handled in accordance with this Safety Data Sheet and the product label. Symptoms or effects that may arise if the product is mishandled (no control of dust generation) and overexposure occurs include:

Inhalation

Acute(Immediate) May cause respiratory irritation
Chronic (Delayed) Repeated and prolonged exposure may cause cancer. Repeated and prolonged exposure may cause sensitization of the respiratory system.

Skin

Acute(Immediate) May cause irritation
Chronic(Delayed) Repeated and prolonged exposure may cause sensitization

Eye

Acute (Immediate) May cause irritation
Chronic(Delayed) No data available

Ingestion

Acute(Immediate) Under normal conditions of use, no health effects are expected.
Chronic(Delayed) Under normal conditions of use, no health effects are expected.

Carcinogenic Effects

Carcinogenic Effects Wood dust is listed by NTP known to be a Human Carcinogen(10th Report), IARC Monographs: Wood dust, group 1 – IARC Group 1: Carcinogenic to humans; sufficient evidence of carcinogenicity. This classification is primarily based on studies showing an association between occupational exposure to wood dust and adenocarcinoma of the nasal cavities and paranasal sinuses. IARC did not find sufficient evidence of an association between occupational exposure to wood dust and cancers of the hypopharynx, oropharynx, lymphatic and hematopoietic systems, lungs, stomach, colon or rectum.

	CAS	OSHA	IARC	NTP
Wood dust as Wood dust, all soft and hard woods	Not Available	Not listed	Group 1 – Carcinogenic	Known Human Carcinogen
Formaldehyde	50-00-0	Specifically Regulated Carcinogen	Group 1 – Carcinogenic	Known Human Carcinogen

Section 12: Ecological information

12.1 Toxicity

Formaldehyde: EC50 5.8mg/l/48h (Daphnia magna)
Not applicable for OSB

12.2 Persistence and degradability

No further relevant information available

12.3 Bioaccumulative potential

Formaldehyde: log POW: 0.35
Not applicable for particleboard/MDF

12.4 Mobility in soil

No further relevant information available
General notes

Generally not hazardous for water

12.5 Results of PBT and vPvB assessment

PBT	Not applicable
Other adverse effects	Not applicable

12.6 Other adverse effects

No further relevant information available

Section 13: Disposal considerations

13.1 Waste treatment methods

Recommendation	Disposal according to local regulations
Uncleaned packaging recommendations	Dispose of packaging according to regulations on the disposal of packaging

Section 14: Transport information

14.1 UN-number

ADR, ADN, IMDG, IATA	Void
----------------------	------

14.2 UN proper shipping name

ADR, ADN, IMDG, IATA	Void
----------------------	------

14.3 Transport hazard class(es)

ASR, ADN, IMDG, IATA class	Void
----------------------------	------

14.4 Packing group

ADR, IMDG, IATA	Void
-----------------	------

14.5 Environmental hazards

Not applicable

14.6 Special precautions for user

Not applicable

14.7 Transport in bulk according to Annex II of Marpol and the IBC Code

Not applicable

UN "Model Regulation"

Void

Section 15: Regulatory Information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

Not applicable

15.2 Chemical Safety Assessment

A Chemical Safety Assessment has not been carried out

Section 16: Other information

This information is based on our present knowledge and comes from sources believed to be accurate or otherwise technically correct. However, this shall not constitute a guarantee for any specific product features and shall not establish a legally valid
