Space for **solutions.**

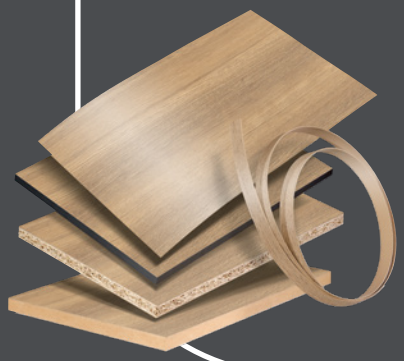

Bring projects to life to your customers' complete satisfaction with our carefully selected range of new on-**trend and authentic decors, as well as functional wood-based materials and helpful digital services included in the Decorative Collection 26+**. Design not only furniture and rooms, but your success too. Trust us as your **reliable partner –** because we make **room for solutions!**

All our shown and mentioned decors are reproductions.

The Decorative Collection 26+ at a glance

- 150 decors for Decorative Boards in matching materials: **10 new decors,** including the on-trend **beige colour**, as well as new **wood reproductions with a linear look**
- 48 PerfectSense® decor / texture combinations: **10 new decors**, a harmonised colour concept with **19 uni decors** and the **improved surface quality** of the lacquered uni decors on particleboard core, as well as the **PerfectSense Ambiance product innovation**
- 84 worktop decor / texture combinations: 11 new introductions and a new edged worktop model with a thickness of 20 mm
- Newly developed surface: the all-over wood pore **ST17 Omnipore Oiled** with a very low gloss level
- The new **repeatless decor H1316 ST17 Bookmatch Oak** for even more natural wood effects on large-scale applications
- **4 new decors in landscape format** in the laminates product range in door sizes
- **4 new decors** in the accent edging segment

With the tried-and-tested **decor and material combination**, you make no compromises when it comes to design and quality. Our entire range of decors is available to you on a variety of **core boards and laminates**. We also offer you **edging solutions** that are perfectly matched to the decor, texture and gloss level of the respective surface. Or you can create visual design highlights with our selection of accent edging.

Discover the entire Decorative Collection 26+ with all the new introductions.

to.egger.link/decorative-collection

Space for **something new.**

At EGGER, we constantly focus on societal themes that impact and shape our new introductions for furniture and interior design. With the extensive decor and product range in the Decorative Collection, as well as continuous updates, which from now on will occur every two years, we make sure you don't miss out on new trends and products.

Visual harmony.

Using the **trend colour beige** – whether as a uni colour or stone reproduction – you can create rooms and furniture with visually harmonious softness. **Linear Italian woods** are an elegant combination option.

Matt aesthetics.

We have optimised our **PerfectSense range and** added further **uni colours to create consistently matt interior designs in contemporary colours.** You will find the right matt product solution for every application. Thanks to their anti-fingerprint property, they combine sophisticated matt aesthetics and impressive functionality.

Impressive surfaces.

With the **new repeatless decor H1316 ST17 Bookmatch Oak,** we are setting new standards in the reproduction of natural wood effects for large-scale applications.

In combination with the **new ST17 Omnipore Oiled,** this creates an authentic look that is deceptively close to the appearance of oiled real wood.

All our shown and mentioned decors are reproductions.

PRODUCT INNOVATION

EGGER PerfectSense® Ambiance Lacquered MDF

Matt surfaces are an integral part of modern interior design. PerfectSense Ambiance is the latest innovation in the PerfectSense product family.

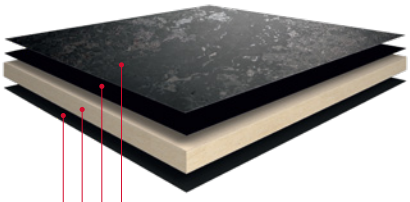

EGGER PerfectSense Ambiance Lacquered MDF impress with a visually and haptically synchronised lacquered surface whose partial gloss effects are perfectly matched to the respective decor image. This innovative combination makes stone reproductions appear particularly authentic and opens up new possibilities for exclusive designs.

» More information: to.egger.link/perfectsense-pa-mdf

BENEFITS

- Reduced cleaning effort thanks to anti-fingerprint properties in the matt areas
- Horizontal application options (except kitchen worktops)
- Optimised size
- Bacteria and germs are reduced by 99.9 % within 24 hours
- Decor and texture combination between PerfectSense Ambiance Lacquered MDF, PerfectSense Ambiance Laminates and PerfectSense ABS Edging

Product structure

F129 PA
Beige Ambiance Granite

The EGGER PerfectSense Ambiance Lacquered MDF in the colours F128 Black Ambiance Granite and F129 Beige Ambiance Granite harmoniously combine glossy areas with a velvety-matt surface. Perfectly coordinating partial gloss effects with the underlying decor image of stone reproductions creates a synchronised look, as well as a unique visual and haptic experience.

With PerfectSense® Ambiance, we make the look tangible.

Matthias Wombacher
Head of Design and Decor Management

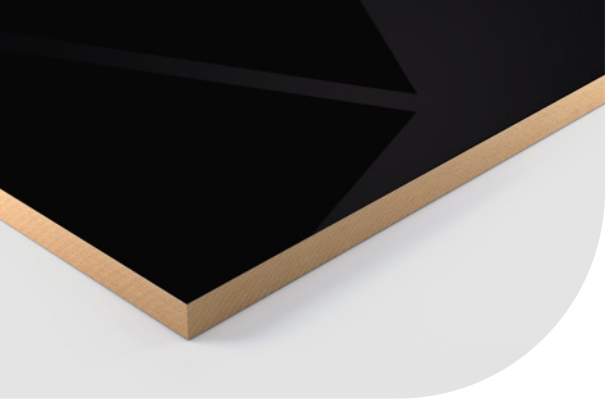

Just like the matt PerfectSense surfaces, PerfectSense Ambiance surfaces have an anti-fingerprint property in the matt areas. This makes designs with PerfectSense Ambiance Lacquered MDF not only visually appealing, but also functional in use, as the cleaning effort is reduced.

PerfectSense Ambiance was honoured with the iF Design Award 2026 in the “product design” category.

F129 PA
Beige Ambiance Granite

EGGER PerfectSense® Gloss Lacquered MDF

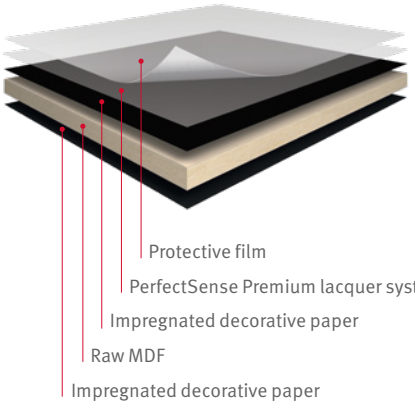

EGGER PerfectSense Gloss Lacquered MDF impress with their special gloss and reflective nature. The innovative manufacturing process ensures high levels of resistance and a long service life of the surface. The homogeneous MDF core material has a positive effect on the properties of the high-end surface.

» More information: to.egger.link/perfectsense-pg-mdf

BENEFITS

- Exceptional surface calm
- Optimised size
- Bacteria and germs are reduced by 99.9 % within 24 hours
- Decor and texture combination between PerfectSense Gloss Lacquered MDF, PerfectSense Gloss Laminates and PerfectSense ABS Edging

EGGER PerfectSense® Matt Lacquered MDF

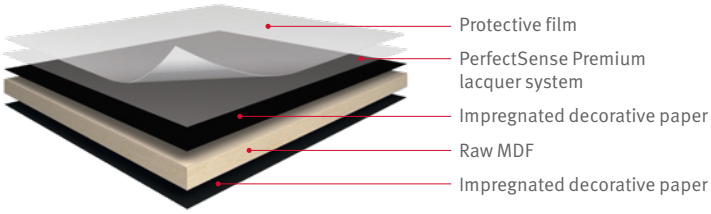

BENEFITS

- Reduced cleaning effort thanks to anti-fingerprint properties
- Horizontal application options (except kitchen worktops)
- Optimised size
- Bacteria and germs are reduced by 99.9 % within 24 hours
- Decor and texture combination between PerfectSense Matt Lacquered MDF, PerfectSense Matt Laminates and PerfectSense ABS Edging

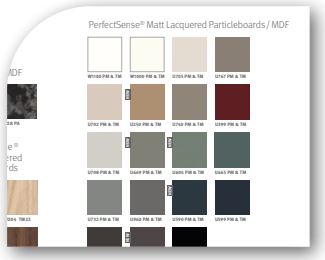

EGGER PerfectSense Matt Lacquered MDF have a matt, velvety-warm look and feel and anti-fingerprint property. The innovative manufacturing process ensures high resistance and a long service life for the surface, which can also be used for horizontal applications, with the exception of kitchen worktops. The MDF core boards guarantee a particularly homogeneous surface with an exceptional feel.

EGGER PerfectSense® Matt Lacquered Particleboards

EGGER PerfectSense Matt Lacquered Particleboards meet the ongoing trend towards matt design. They impress with their matt, velvety-warm and textured surfaces on a recyclable particleboard core.

PerfectSense Matt Lacquered Particleboards are available in the textures TM, TM12, TM22, TM28 and TM37.

Uni decors with the TM lacquer surface appear extremely elegant thanks to their low gloss level and are particularly suitable for the recommended vertical usage thanks to their anti-fingerprint properties.

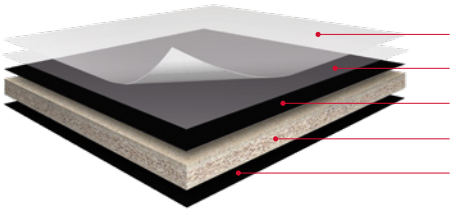

» More information: to.egger.link/perfectsense-matt-pb

BENEFITS

- Reduced cleaning effort thanks to anti-fingerprint properties
- Wood and material reproductions look even more natural thanks to the matt lacquer finish
- Optimised size
- Bacteria and germs are reduced by 99.9 % within 24 hours
- Decor and texture combination between PerfectSense Matt Lacquered Particleboards, PerfectSense Matt Laminates and PerfectSense ABS Edging

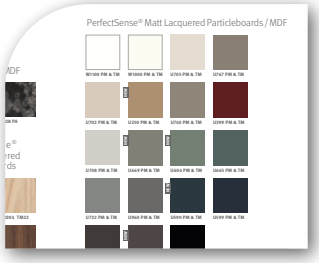

Product structure (TM)

New texture: PerfectSense® Matt TM

The new TM texture gives our EGGER PerfectSense Matt Lacquered Particleboards a velvety-warm surface with an even better feel. The innovative lacquer system ensures a particularly calm surface and an even, matt texture with anti-fingerprint properties.

19 uni decors from the EGGER Decorative Collection are available in the PM and TM decor / texture combinations; **an overview of the uni decors can be found on page 76.**

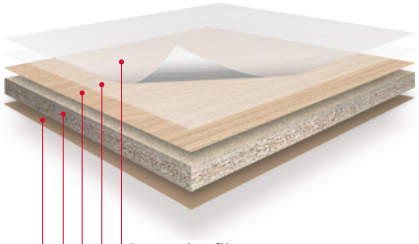

All our shown and mentioned decors are reproductions.

The lacquered surfaces with the TM12 and TM22 wood textures give wood reproductions a particularly natural character.

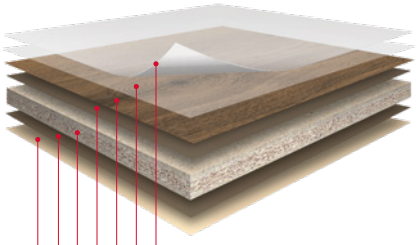

The PerfectSense Feelwood lacquered surfaces TM28 and TM37 are synchronised with the underlying woodgrain decor, giving PerfectSense Matt Lacquered Particleboards an extremely authentic look and feel.

EGGER Decorative Boards

EGGER Decorative Boards offer a well-balanced variety of decors with surface textures to match the latest trends. The wide selection of core materials, combined with the option of different coating constructions, enable customised solutions for your furniture construction and interior design projects.

Decorative Boards have an appealing look and feel that very closely replicate real materials. At the same time, they combine the practical advantages of a coated board. They are characterised by excellent surface properties and can be processed tool-friendly.

On the following pages, you can find out more about the many variants and possible applications of our Decorative Boards.

Product overview

PRODUCT	APPLICATIONS	CHARACTERISTICS
EGGER Decorative Particleboards P2  Page » 32	• Classic furniture and interior design (furniture frontals, carcasses, wall cladding, tabletops with moderate stress exposure)	• Long-lasting beautiful surface • Lightfast • Resource-saving
EGGER Decorative Particleboards JP F0,3 (F**) / GB ENF MR**  Page » 32	• For vertical and horizontal applications in furniture and interior design for regions with increased humidity	• Resistant to moderate moisture • Moisture-resistant gluing for improved swelling behaviour • Certified according to jap. Emission class F**** based on JIS A 5908 • Comply with Chinese standard GB / T 39600, class ENF (Emission Non Formaldehyde)
EGGER Decorative MDF ST  Page » 34	• High-quality furniture frontals • Shelf bottoms • Wall cladding	• Easy profiling • High transverse tensile strength and edge stability • Low swelling behaviour
EGGER Decorative Lightweight Boards  Page » 35	• Tabletops and worktops • Internal doors • Sliding doors • Caravan interior design • Trade fair construction • Shopfitting	• Low specific weight » easy handling • Sandwich construction » high mechanical strength

Antimicrobial surface properties

in accordance with

ISO 22196 (= JIS Z 2801)

- Germs, bacteria and viruses are reduced by 99.9 % on the hygienically sealed and closed surface within 24 hours
- Extended area of application in furniture and interior design (highly frequented public areas such as doctors' surgeries, hospitals, nurseries)

Good to know

- Available for holistic, design-oriented design in decor match with EGGER Edging and Laminate.
- The surface of EGGER Decorative Boards is ready for use, i.e. no oiling, staining or other protective measures are necessary.
- The resistant surface enables easy processing in furniture production. This makes them more cost-effective to manufacture and care for than real materials. More resistant to scratches and stains than veneered surfaces. Hygienic and sealed surface for easy cleaning. No special care required during use.
- The surface of the Decorative Boards is lightfast. If necessary, it enables visually inconspicuous replacement of damaged elements as well as later extensions in the same design, thus creating the basis for durable furniture and interior fittings.
- Due to the used core material, they are significantly more dimensionally stable than solid wood.
- Decorative Boards are recyclable and can be used at the end of their product life for the production of new wood-based materials.
- Safety in the international project implementation through the surface properties (such as abrasion or scratch resistance) that comply with the standard EN14322. Compliant with the requirements for formaldehyde emissions according to the European REACH Regulation as well as to the TSCA regulation in the USA.

EGGER Decorative Particleboards

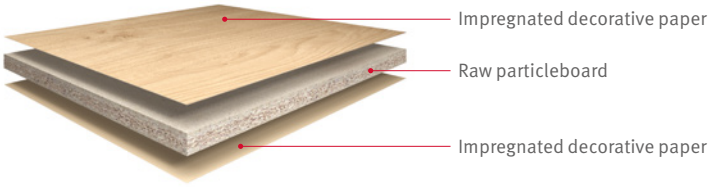

EGGER Decorative Particleboard in E1E05 quality is an excellent choice for applications in furniture construction and interior design. Particleboards coated on both sides with impregnated decorative paper serve as a core material. They fulfil both aesthetic and functional requirements.

» More information: to.egger.link/decorative-pb

BENEFITS

- Stable three-layer construction
- Available with E1E05 P2 or JP F0,3 (F****) / GB ENF MR core board
- Conserves resources thanks to the use of recycled materials
- Compliant with the requirements for formaldehyde emissions according to the European REACH Regulation as well as to the TSCA regulation in the USA

Product structure

to.egger.link/availability-guide

EGGER Decorative MDF

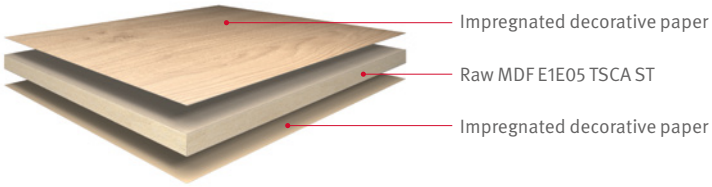

EGGER Decorative MDF combines the high physical properties of EGGER MDF with the decorative variety of the Decorative Collection 26+. Its homogeneous product structure is ideal for milling and profiling shelves, wall cladding or furniture frontals. MDF E1E05 ST is coated on both sides with impregnated decorative paper.

» More information: to.egger.link/decorative-mdf

BENEFITS

- High transverse tensile strength and edge stability
- Uniform density
- Easy profiling
- Ideal for surface milling
- Compliant with the requirements for formaldehyde emissions according t the European REACH Regulation as well as to the TSCA regulation in the USA

Product structure

EGGER Decorative Lightweight Boards

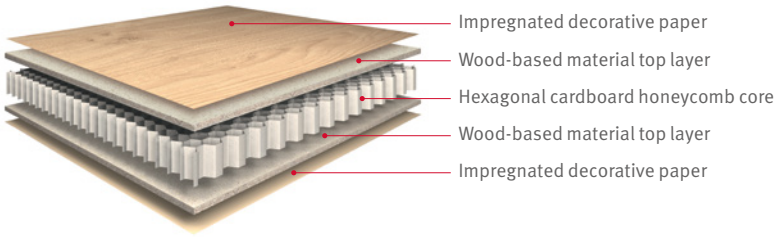

Lightweight materials play an important role in furniture construction and offer advantages for fabricators and end users: low weight, high mechanical strength, flexible application options, maximum design flexibility and economical use of the raw materials used.

» More information: to.egger.link/decorative-lightweight

BENEFITS

- Light and stable
- High bending strength
- Better utilisation of transport capacities ⇢ reduced logistics costs

EGGER Worktops

EGGER Worktops based on laminate surfaces or compact laminates are the highlight in any kitchen. Benefit from great design flexibility when planning your kitchen thanks to our wide range of decors, from white tones and uni colours to authentic wood and material reproductions. The texture, which is perfectly matched to the respective decor, gives the worktops a natural feel and high-quality look. On the following pages, you can find out more about the many different variants of our worktop range.

Product overview

PRODUCT	CHARACTERISTICS
THIN WORKTOPS	
EGGER Compact Laminate Worktops Black Core / Coloured Core  Page » 39/40	• Enables trend-orientated kitchens with particularly thin worktops • Can also be used in humid conditions • Ideal for undermount sinks in kitchens and bathrooms
EGGER PerfectSense Ambiance Square Edged Worktops  Page » 41	• Visually and tactilely synchronised textured lacquer surface with a matt-gloss effect that perfectly matches the underlying granite or marble decor • Lower weight and warmer to the touch than stone or marble worktops • Attractively priced alternative to natural stone worktops
EGGER Square Edged Worktops  Page » 42	• Lower weight and warmer to the touch than stone or marble worktops • Attractively priced alternative to natural stone worktops • Caters to the trend for modern, thin worktops
38 MM WORKTOPS	
EGGER Feelwood Square Edged Worktops  Page » 43	• Synchronised pore surface makes the wood decors look authentically like real wood • Less maintenance compared to solid wood worktops
EGGER PerfectSense Matt Square Edged Worktops  Page » 44	• Super-matt look with a pleasant feel and anti-fingerprint property • Enables impressive matt kitchen designs in combination with EGGER PerfectSense Lacquered Boards, Laminates and Edging
EGGER Postforming Worktops  Page » 45	• Seamless laminate coating, starting on the surface and extending to the curves and the underside • Less maintenance compared to solid wood worktops • Lower weight and warmer to the touch than stone or marble worktops • Easier machining and processing, e.g. for trimming and cutting to size, and therefore more added value in-house

EGGER Compact Laminate Worktops Black Core

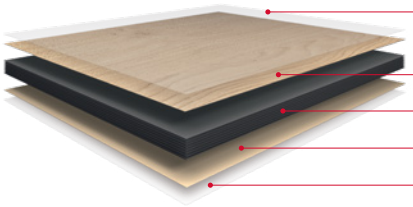

EGGER Compact Laminate Worktops Black Core are characterised by their moisture resistance and durability. They are supplied with bevelled milling on the top and bottom of the long edges. The black core colour underlines the modern design of these 12 mm thin worktops in the edge area.

» More information: to.egger.link/compact-worktops-black-core

BENEFITS

- Enables trend-orientated kitchens with particularly thin worktops
- Can also be used in humid conditions
- Ideal for undermount sinks in kitchens and bathrooms
- Time and cost savings thanks to pre-bevelled long edges

Product structure

Bevelled edges on the long sides

to.egger.link/availability-guide

EGGER Compact Laminate Worktops Coloured Core

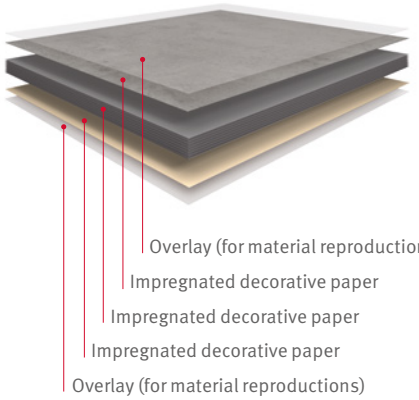

These Compact Laminate Worktops impress with their white, light grey or dark grey core, which particularly emphasises the design of the 12 mm thin worktop in the edge area. The long edges also have bevelled milling on the top and bottom.

» More information: to.egger.link/compact-worktops-coloured-core

BENEFITS

- Thin worktop with coloured core
- Can also be used in humid conditions
- Ideal for undermount sinks in kitchens and bathrooms
- Time and cost savings thanks to pre-bevelled long edges

Product structure

Bevelled edges on the long sides

All our shown and mentioned decors are reproductions.

PRODUCT INNOVATION

EGGER PerfectSense® Ambiance Square Edged Worktops

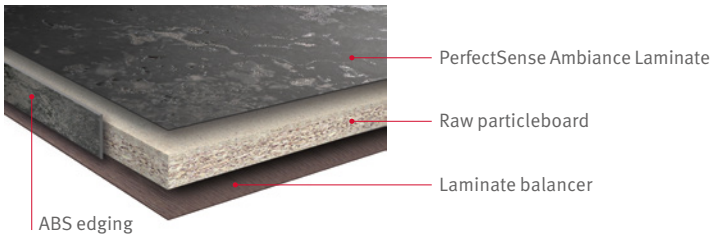

BENEFITS

- Visually and tactilely synchronised textured lacquer surface with a matt-gloss effect
- Lower weight and warmer to the touch than stone or marble worktops
- Easier machining and processing, e.g. for trimming and cutting to size, and therefore more added value in-house
- Attractively priced alternative to natural stone worktops
- Caters to the trend for modern, thin worktops

EGGER PerfectSense Ambiance Worktops impress with their visually and tactilely synchronised textured lacquered surface, whose matt-gloss effect is perfectly matched to the underlying granite or marble decor. In combination with the low nominal thickness of just 20 mm, this creates the impression of a natural stone worktop. The predominantly super-matt, velvety-warm surface also has an anti-fingerprint property. The front longitudinal edge is edged with a 1.5 mm thick ABS edging. A temperature and steam resistant PUR hotmelt adhesive is used.

» More information: to.egger.link/perfectsense-pa-worktops

Product structure

PRODUCT INNOVATION

EGGER Square Edged Worktops

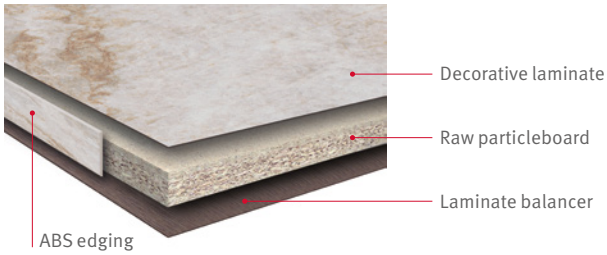

This worktop model with a nominal thickness of 20 mm impresses with its appealing natural stone look. There is a choice of attractive stone and marble decors to emphasise this impression. 1.5 mm thick ABS edging is used on the front longitudinal edge, which is applied with moisture-resistant PUR hotmelt.

» More information: to.egger.link/thin-square-edged-worktops

BENEFITS

- Lower weight and warmer to the touch than stone or marble worktops
- Easier machining and processing, e.g. for trimming and cutting to size, and therefore more added value in-house
- Attractively priced alternative to natural stone worktops
- Caters to the trend for modern, thin worktops

Product structure

EGGER Feelwood® Square Edged Worktops

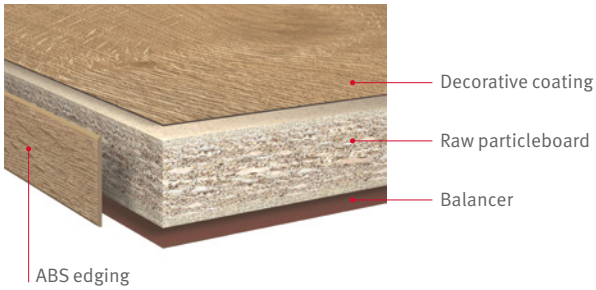

EGGER Feelwood Worktops in a nominal thickness of 38 mm get their natural look from the texture that runs synchronously with the decor image. The front longitudinal edge is edged with a 1.5 mm thick ABS edging that perfectly matches the woodgrain decor. A temperature- and vapour-resistant PUR hotmelt adhesive is used. Matching endgrain edges that are additionally available for the short ends can be applied to underline the natural appearance of the decors that can hardly be distinguished from solid wood.

» More information: to.egger.link/feelwood-worktops

BENEFITS

- Synchronised pore textures ST32, ST37 and ST40 make the wood decors look authentically like real wood
- Less maintenance compared to solid wood worktops

Product structure

EGGER PerfectSense® Matt Square Edged Worktops

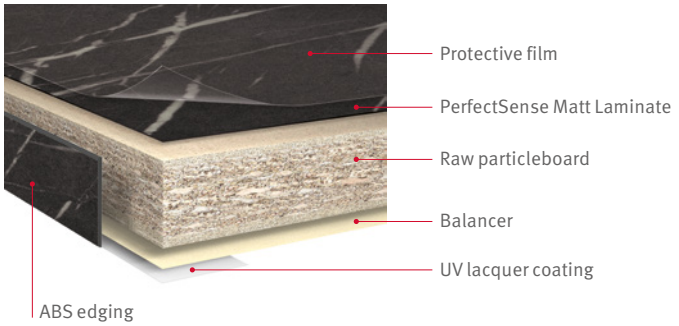

EGGER PerfectSense Matt Worktops in 38 mm nominal thickness are characterised by their super-matt look, pleasant feel and anti-fingerprint property. The front longitudinal edge is realised with a 1.5 mm thick ABS edging that perfectly matches the decor. A temperature and steam resistant PUR hotmelt adhesive is used. With this worktop, you can fulfil the trend for matt surfaces.

» More information: to.egger.link/perfectsense-pm-worktops

BENEFITS

- Super-matt, velvety-warm surface with anti-fingerprint property
- Enables impressive matt kitchen designs in combination with EGGER PerfectSense Lacquered Boards, Laminates and ABS Edging

Product structure

EGGER Postforming Worktops

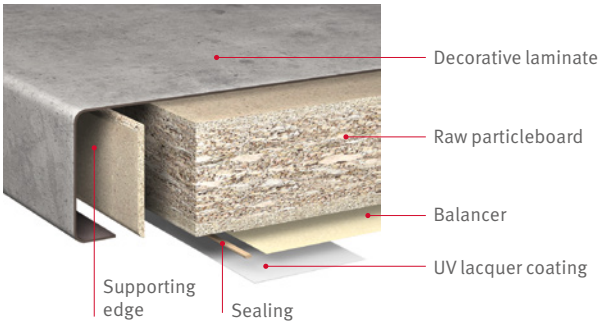

EGGER Postforming Worktops with a nominal thickness of 38 mm are the established and classic solution. Their enduring appeal is down to the lack of a joint, owing to the top surface continuing over the radii and underneath. On the front longitudinal edge, the thin particleboard support edge ensures improved surface calm.

» More information: to.egger.link/postforming-worktops

BENEFITS

- Large selection of uni colours, wood and material reproductions
- Lower weight and warmer to the touch than stone or marble worktops
- Less maintenance compared to solid wood worktops
- Easier machining and processing, e.g. for trimming and cutting to size, and therefore more added value in-house

Product structure

EGGER Worktops Accessories

Coordinated with the EGGER worktop models, you can obtain further products for customised additions and convenient installation.

EGGER Splashbacks

Splashbacks give the kitchen a modern, attractive look. The robust splashback is ideal for concealing an existing backsplash, is more straightforward to work with than glass and is available from storage in all worktop decors in the format 4,100 × 640 × 8 mm.

» More information: to.egger.link/splashbacks

EGGER Laminates

Laminates are also available for all worktop decors for vertical and horizontal applications.

» More information: to.egger.link/laminates

EGGER Laminates in Variable Length

For all Postforming, PerfectSense Matt and PerfectSense Ambiance Worktops as well as the Square Edged Worktops, which are only 20 mm thick, you can obtain laminates with the same decor and matching texture in variable length between 1,000 and 6,000 mm in 0.60 mm thickness. This allows rounded or curved furniture elements, both-sided decorative flanks, tables or furniture fronts to be complemented with the same decor and matching texture.

» More information: to.egger.link/laminates-variable-length

EGGER ABS Edging

Compact Laminate Worktops do not require additional edging.
For all other worktop models, we offer an edging solution in 24 or 43 × 1.5 mm format and roll length of 25 m that perfectly matches the decor. For Feelwood Worktops, edging with an endgrain look is also available.

» More information: to.egger.link/abs-edging

» More information: to.egger.link/worktop-accessories

EGGER Worktop Wall Profiles

For Postforming and Feelwood Worktops, we offer matching worktop wall profiles in the format 4,100 × 25 × 25 mm.

EGGER Accessories Set for Worktop Wall Profiles

The Accessories Set available from stock is colour-coordinated with the worktop decor and sealing lips of the wall profile. It includes inner and outer corners, end caps and screws for easy installation.

EGGER Worktop Connectors

These connectors are available in pairs for corner joints on the 12 or 20 mm thin EGGER worktop models.

EGGER Sealing for Corner Joints

The sealing optimally protects the corner joint against the penetration of moisture. It is available in white, grey, brown and black for all worktop models.

 All our shown and mentioned decors are reproductions.

EGGER Laminates

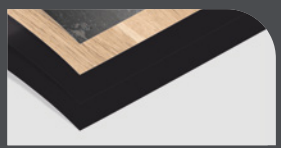

EGGER Laminates

EGGER Laminates combine decorative surfaces with high resistance. They are the ideal solution for vertical and horizontal surfaces subject to increased stress. As a mouldable material, this hard-wearing material also enables curved applications that would not be possible with real marble, for example.

Inspire your customers with creative ideas and outstanding design. On the following pages you can find out more about the wide range of applications for laminates.

Product overview

PRODUCT	APPLICATIONS	CHARACTERISTICS
EGGER Laminates / XL / Variable Length  Page »51	• Tabletops and worktops • Rounded or curved furniture elements • Furniture fronts • Door elements • Wall cladding	• Large selection of decors for customised designs • Laminates XL with synchronised surface texture for a particularly natural look and feel • Reduced waste thanks to variable-length laminates • Also available MED-certified for ship interiors
EGGER Coloured Core Laminates / PerfectSense Matt & Gloss Coloured Core Laminates  Page »52	• Tabletops • Mitred furniture • Furniture fronts • Door elements • Shelves and side flanks	• Homogeneous, coloured core with a through-dyed look • Enables a virtually seamless look for mitred elements • In combination with solid wood inserts, an elegant edge look is created, e.g. for tables or doors • Laminates Coloured Core (without PerfectSense lacquer surface) are also available MED-certified for ship interiors
EGGER Laminates in Door Sizes  Page »53	• Door leaf • Door lining (frame) • Decorative panelling	• Reduces costs thanks to favourable door formats • Expands the scope for design, e.g. through material reproductions on the door
EGGER PerfectSense Matt / Gloss / Ambiance Laminates  Page »54	• Table and worktops (only with PM and PA texture) • Rounded or curved furniture elements • Furniture fronts • Door elements • Shelves and side flanks • Wall cladding	• Super-matt, velvety-warm lacquer surface with anti-fingerprint property (textures PM, TM12, TM22) • Visually and haptically synchronised textured lacquer surface with matt-gloss effect (texture PA) • High-gloss lacquer surface with special reflective nature and brilliance (texture PG) • Available in a decor and texture match with EGGER PerfectSense Lacquered Boards and ABS Edging

All our shown and mentioned decors are reproductions.

EGGER Laminates / XL / Variable Length

BENEFITS

Laminates
- Large selection of decors for customised designs
- Good postforming characteristics for curved or rounded furniture, also in stone looks

Laminates XL
- Synchronised surface texture for a particularly natural look and feel
- Favourable cutting width

Laminates in Variable Length
- Reduced waste thanks to customised cutting
- Easier handling thanks to customised format

EGGER Laminates stand for the highest quality and versatility in furniture construction. The abrasion-, impact- and scratch-resistant surface is ideal for horizontal applications with increased stress. The large selection of decors, ranging from elegant wood and material reproductions to modern uni colours, enables a wide variety of versatile designs.

» More information: to.egger.link/laminates

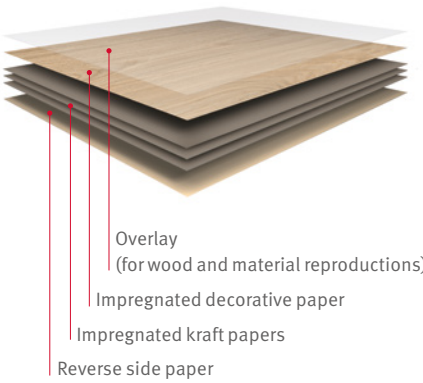

The surface texture of the **Laminates XL** is synchronised with the underlying wood reproduction. The resulting look and feel can hardly be distinguished from solid wood or veneer. The width of 2,060 mm also has advantages in terms of waste.

» More information: to.egger.link/laminates-XL

Laminates in Variable Length are available in all Postforming, PerfectSense and all 20 mm thin EGGER worktop decors in lengths between 1,000 mm and 6,000 mm with millimetre precision. This means that counters, breakfast bars, fronts, shelves or side panels can be added to the kitchen in a material-saving and cost-efficient way.

» More information: to.egger.link/laminates-variable-length

Product structure

to.egger.link/availability-guide

EGGER Laminates Coloured Core / PerfectSense® Matt & Gloss Laminates Coloured Core

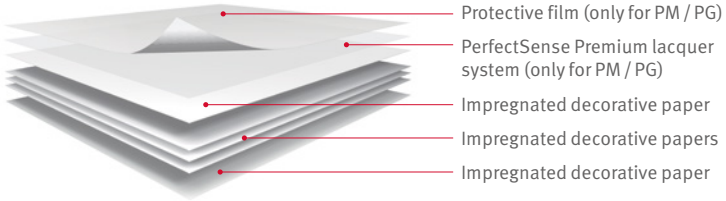

BENEFITS

- Homogeneous, coloured core with a through-dyed look
- Selected decors also available with a matt or high-gloss PerfectSense lacquer surface
- Enables a virtually seamless look for mitred elements
- In combination with solid wood inserts, an elegant edge look is created, e.g. for tables or doors

Laminates Coloured Core consist of several layers of a uni-coloured decorative impregnate. With mitred sales counters, reception counters or cubic elements, joints and butt edges are almost invisible. Laminates Coloured Core without PerfectSense lacquer surface are also available MED-certified for use in marine interior design.

BENEFITS

- Reduces costs thanks to favourable door formats
- Cross-grain decors also available for a special look in the door area
- Expands the scope for design, e.g. through material reproductions on the door

EGGER Laminates in Door Sizes

Due to their resistant surface, laminates are ideally suited for the decorative design of interior doors, especially in public buildings, schools, hospitals, hotels and offices. All door laminates are available in common door size formats and the standard format. There is a choice of 104 decors, including 12 cross-grain wood reproductions.

Thanks to the decor and material combination, the decors can be ideally combined with EGGER Decorative Particleboards and ABS Edging.
This creates a perfectly coordinated interior design from the door to the furniture.

EGGER Edging

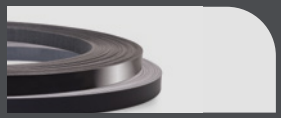

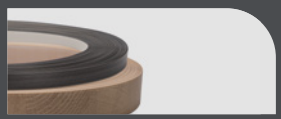

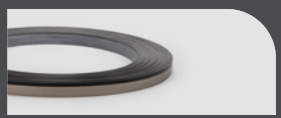

EGGER Edging

Always the right finish

Furniture as if from a single mould or in accentuated designs is created by matching the decorative board and edging in terms of colour, texture and gloss level. The large selection of edges in the Decorative Collection26+ offers solutions for a wide range of design requirements – whether coordinated in colour and decor or as an accent.

EGGER Edging is used for edging coated wood-based materials such as EGGER Decorative Particleboards, MDF, Lightweight and Laminate Bonded Boards. They provide the perfect finish for decorative coatings – whether matching the decor or as a targeted accent. EGGER Edging is available in matching decor and texture combinations. On the following pages, you can find out more about the versatile variants of our edging range.

Product overview

PRODUCT	APPLICATIONS	CHARACTERISTICS
EGGER ABS Edging  Page » 59	• Applications in furniture and interior design such as furniture fronts, furniture bodies, tabletops and wall cladding elements	Everything from a single source: • With EGGER Edging, you only need one contact for the board and edge • Joint decor development of board and edge guarantees optimum coordination • Immediate and fast availability from storage
EGGER PerfectSense ABS Edging  Page » 60	• Frontals • Carcass • Visible sides • Worktops	• Optimum matching of decor and gloss level between board and edge in both matt, high-gloss and matt-textured areas
EGGER ABS Accent and Endgrain Edging  Page » 62	• Worktops • Table tops • Frontals • Shelves	• Further design options for interior design • Easily set accents and highlights • Even more realistic reproduction of real materials • Selected additions to the same decor ABS edging range (endgrain edging)
EGGER PMMA Accent Edging  Page » 64	• Table tops • Frontals	• Special visually reflective nature thanks to a glass-like appearance • Easily set accents and highlights

All our shown and mentioned decors are reproductions.

EGGER ABS Edging

EGGER ABS Edging is used for edging coated wood-based materials and provides the matching decorative finish. ABS edging is available in various dimensions. In terms of decor, texture and gloss level, it is matched to the EGGER decors and products.

» More information: to.egger.link/abs-edging

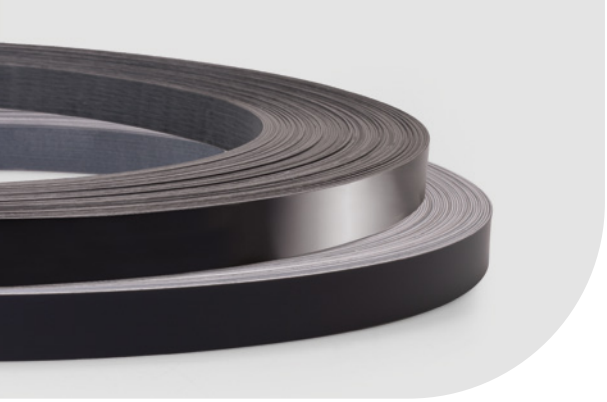

BENEFITS

- Wide selection of widths and thicknesses
- Easy to process
- Matched to EGGER decors and products in terms of decor, texture and gloss level

EGGER ABS Accent and Endgrain Edging

EGGER ABS Accent and Endgrain Edging is used for edging coated wood-based materials and provide the matching decorative finish. It maximises the visual effect.

The design of the end-grain edging creates an authentic end-grain look by replicating a log that has been cut across its length with visible annual rings. This edge is based closely on the look of the model from nature.

» More information: to.egger.link/abs-accent-edging

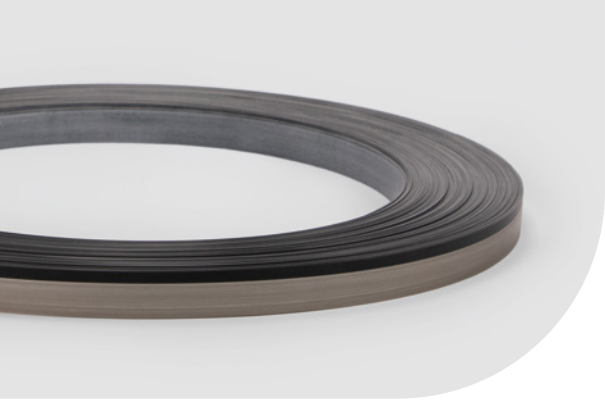

BENEFITS

- Cost-efficient highlighting
- Realisation of design trends
- Set accents easily
- Creates a harmonious overall look in combination with the board decor
- Matched to EGGER decors and products in terms of decor, texture and gloss level

EGGER Compact Laminates

EGGER Compact Laminates

Thanks to their product properties, EGGER Compact Laminates offer a wide range of solutions even for demanding applications in furniture and interior design. They impress with their attractive slimline design, moisture resistance and durability.

Product overview

PRODUCT	APPLICATIONS	CHARACTERISTICS
EGGER Compact Laminates Black Core  Page » 69	• Interior applications with a particular focus on hygiene (e.g. hospital facilities). • Partition walls, shelves or wall cladding in humid conditions such as bathrooms, sanitary facilities or changing rooms	• High specific weight • Moisture-resistant • High bending strength
EGGER Compact Laminates Coloured Core  Page » 70	• Furniture construction (e.g. office tables, kitchen worktops), wall cladding	• Homogeneous, coloured core for virtually invisible butt edges and joints

 All our shown and mentioned decors are reproductions.

EGGER Compact Laminates Black Core

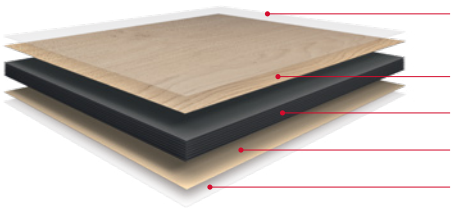

BENEFITS

- Extended stock program available at short notice
- Homogeneous material for customised millings, drill holes in surface and edge
- No edging required
- Moisture-resistant
- Antibacterial surface properties in accordance with ISO 22196 (= JIS Z 2801)
- Lightfast when used indoors
- Large optimised size

Compact Laminates are decorative multi-layer compact laminates in accordance with EN 438-4 (black core) or EN 438-8 (pearlescent decors) with a thickness of 2 mm or greater. They offer a wide range of solutions for interior applications with increased demands on the core material and surface. Cleanliness and hygiene are particularly important in hospitals, doctors' surgeries and care facilities. Here, the EGGER Compact Laminate offers decisive advantages with its closed surface at the transition to the edge or at the edge itself.

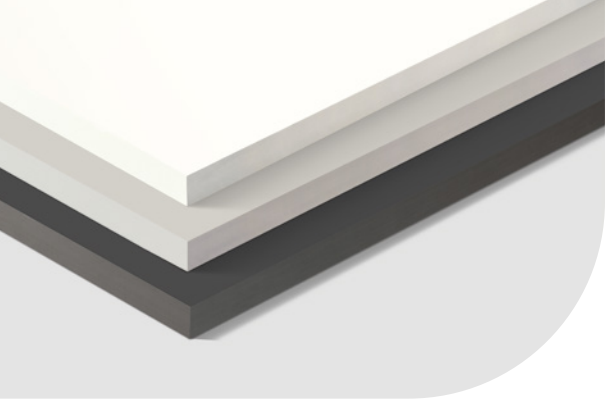

» More details at to.egger.link/compactlaminate-black

Product structure

to.egger.link/availability-guide

EGGER Compact Laminates Coloured Core

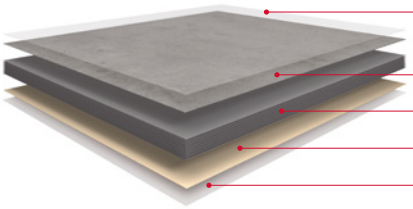

These Compact Laminates compliant with EN 438-9 set special accents with their coloured core. Here, the solid-coloured look comes into its own perfectly. Slim and linear elements create a very design-orientated interior. The EGGER Compact Laminate impresses with its elegant design, combined with stability and robustness.

» More information: to.egger.link/compactlaminate-colour

BENEFITS

- Homogeneous solid-coloured material
- The coloured core means that joints and transitions remain virtually invisible
- No edging required
- Moisture-resistant
- Antibacterial surface properties in accordance with ISO 22196 (= JIS Z 2801)
- Lightfast when used indoors
- Large format with low cutting waste
- Tapped holes and all types of surface milling possible

Preventive fire protection with EGGER Flammex® Products

Schools, hospitals, hotels, shops and other public institutions place increased demands on fire protection. In order to offer the highest level of safety for the planning and design of these buildings, EGGER Flame Retardant Products are classified in accordance with EN 13501-1. They are highly functional and easy to process without restricting design flexibility. On the following pages, you can find out more about the many versatile variants of our range of flame retardant products.

Product overview

PRODUCT	APPLICATIONS	CHARACTERISTICS
EGGER Decorative Flammex Flame Retardant Particleboards 	• For vertical and horizontal applications in dry furniture and interior design with increased fire protection requirements	• Long-lasting beautiful surface • Lightfast • Antimicrobial surface properties in accordance with ISO 22196 (= JIS Z 2801) • Consistent design concepts with other Flammex product solutions
EGGER Laminates Flammex Flame Retardant 	• For curved or bent elements in dry furniture and interior design with increased fire protection requirements	• Excellent formability for curved or rounded furniture elements • Consistent design concepts with other Flammex product solutions

All our shown and mentioned decors are reproductions.

EGGER Flammex®
Flame Retardant Products

BENEFITS

- Classified as B – flame-retardant, very limited contribution to fire
- Balanced product range for a wide variety of applications
- Consistent design concepts with other Flammex product solutions

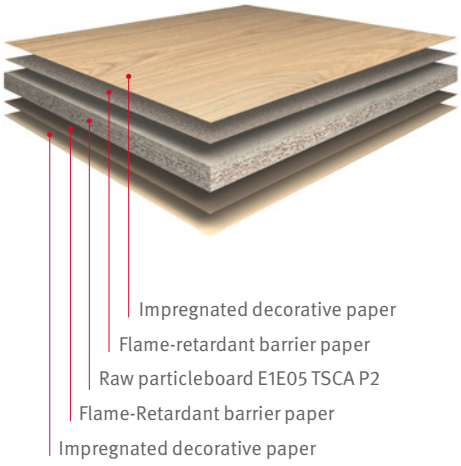

Mode of action of the flame-retardant coating

Under the influence of heat, the intumescent agent contained in the barrier paper starts a multi-stage chemical reaction (so-called intumescent reaction). This results in the formation of carbon foam. It has an insulating effect on the underlying material. Due to this insulating layer, less temperature reaches the surface of the core board material for a certain period of time. This delays the fire and slows down the process overall.

Space for **haptics.**

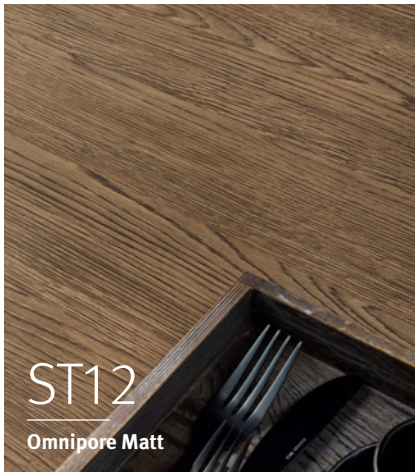

In the age of advancing digitalisation, tactility is becoming increasingly important. That is why we pay particular attention to our textures and surfaces. With expressiveness, character, depth and naturalness, we come as close as possible to the original. You can therefore create outstanding projects to satisfy your customers' every wish.

Wood textures

Only the right texture makes a wood reproduction stand out. Our woodgrain textures are created with matt-gloss effects, gently brushed pores, soft hollows or a natural appearance.

ST10 Deepskin Rough gives mainly natural and original woodgrain decors an authentically rough feel, which is rather reserved thanks to its continuous matt look. It also gives our textile decors an authentically rough surface.

ST12 Omnipore Matt is an all-over texture with irregular distribution and pores of varying depths, which give the surface its elegant, natural look. A light sub-texture provides a velvet touch.

ST17 Omnipore Oiled is the latest generation of an irregular all-over wood pore. Its special feature is that it has a very low gloss level, whereby the pore also appears matt. Together with a slight micro texture in the surfaces, the ST17 achieves the look and feel of an oiled wood surface.

ST19 Deepskin Excellent combines cut floret sections with linear areas. Thanks to the matt and glossy woodgrain, the texture gives the respective decor a lively, natural overall impression that remains visible even on light woodgrain decors.

The feel and matt-gloss effect of ST22 Deepskin Linear give rather linear woodgrain decors a noticeably deep character and a natural, brushed look, as is often seen in conifers.

ST71 Omnipore Oiled Horizontal is the matching horizontal texture for ST17. This means that the look and feel of an oiled wood surface can also be shown on cross-grain woods, which are mainly intended for a better offcut in the door area.

The ST86 Deepskin Legno Horizontal laminate texture is the matching horizontal texture for ST22 Deepskin Linear. It is used on horizontal woodgrains, which are mainly intended for a better offcut in the door area. The haptic and matt-gloss effect of the ST86 give rather linear woodgrain decors a noticeably deep character and a natural, brushed look, as is often seen in conifers.

The STG4 Deepskin Excellent Horizontal laminate texture is the matching horizontal texture for ST19 Deepskin Excellent. It combines cut floret sections with linear areas. Thanks to the matt and glossy woodgrain, the texture gives the decor an exciting yet natural overall impression that remains visible even on light woodgrain decors.

The STG8 Omnipore Deepmatt laminate texture follows the trend of extremely matt surfaces that show no reflection. It is relatively insensitive to signs of wear. The irregular wood pore is deliberately not too deep so it is pleasant to the touch in combination with the slightly rough subtexture.

LACQUERED WOOD PORE WITH ANTI-FINGERPRINT PROPERTY

The TM12 PerfectSense Omnipore Matt lacquered surface gives selected wood reproductions a natural, matt wood pore look with a pleasant velvety-matt feel. Anti-fingerprint property considerably improve usage, especially with dark woodgrain decors, thereby enabling applications in public interior design.

The TM22 PerfectSense Deepskin Linear Matt lacquered surface enhances the natural character of woodgrain decors by combining a deeply brushed feel with a soft and matt look. This surface also gives selected decors their anti-fingerprint property.

Explore the matching decors for all textures:

to.egger.link/textures

Feelwood®

Even the name Feelwood hints at the visual and sensory experience, and the added value offered by these textures. The deep Feelwood synchronised pores impress with a quality that combines the best of two product worlds: On the one hand, a look and feel that comes very close to solid wood and veneer, and on the other, it offers the qualitative advantages of a laminated board.

ST28 Feelwood Nature is synchronously adapted to the sandblasted character of Gladstone Oak and Cuneo Oak. These very authentic decor images are perfected by the not-too-striking look and deep haptics of the surface texture.

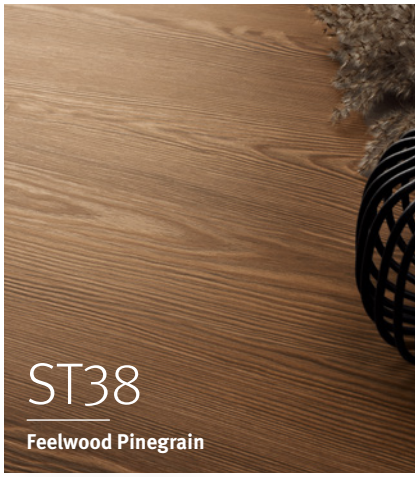

The old-wood look of ST32 Feelwood Vintage has been synchronously adapted to the decor image of Sherman Oak and Davenport Oak. The visual used-look effects in the wood are also perfectly implemented in the deep haptics thanks to the synchronised pore surface.

The strongly brushed but naturally matt character of ST36 Feelwood Brushed gives a wide variety of wood reproductions a synchronised and thus absolutely authentic feel.

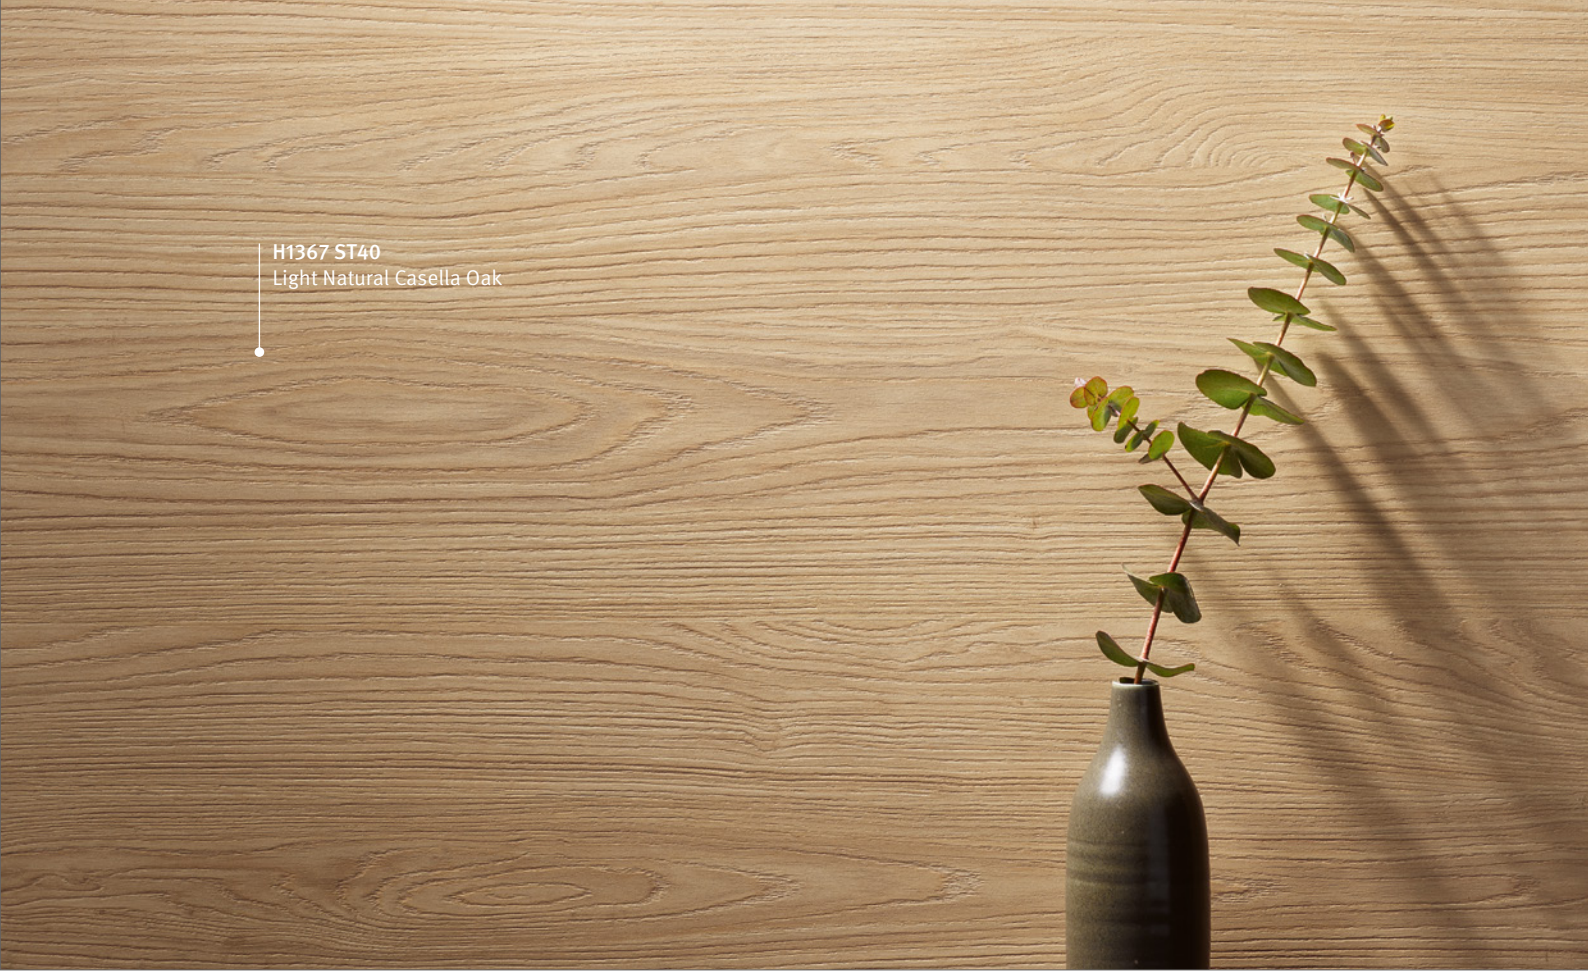

ST37 Feelwood Rift is synchronised with the Halifax Oak decor series. It makes the crack in the decor image particularly noticeable through deep haptics. This gives Halifax Oak a remarkably real solid-wood character in terms of look and feel.

Alternating matt and shinier elements in ST38 Feelwood Pinegrain create the brushed look of a conifer, synchronised with the Mountain Larch decor series. When applied to uni colours, this striking wood texture creates the look of lacquered solid wood.

The ST40 Feelwood Oakgrain reflects the trend for elegant, understated and matt wood effects, but still has a noticeably deep feel and authentic look. Thanks to its matt-in-matt finish, it is very close to the style of a matt-oiled veneer in terms of look and feel. The distinctive wood pore is matt in the depths as well as in the texture between the pores. It is synchronised with the Casella Oak decor series.

H1367 ST40
Light Natural Casella Oak

Explore the matching decors for all textures:

to.egger.link/textures

LACQUERED FEELWOOD SYNCHRONISED PORE WITH ANTI-FINGERPRINT PROPERTY

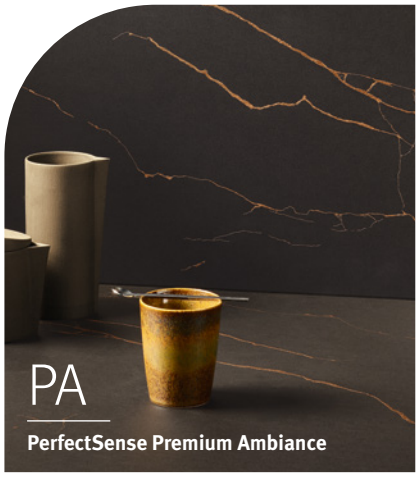

TM28 PerfectSense Feelwood Nature Matt lacquered surface, which is synchronised to the decor image, provides natural woodgrain character with a matt look and feel. Anti-fingerprint property additionally improve the usage property, enabling application in public interior design.

The TM37 PerfectSense Feelwood Rift Matt lacquer surface, designed to match the decor image, reflects the natural character of wood reproductions, such as Halifax Oak, by combining synchronisity and a matt feel and look. Anti-fingerprint property also improve the usage property, thereby enabling many more application possibilities in public interior design.

Material and metal

Imitations of stone and metal are becoming increasingly important. The matching texture gives these decors the desired authenticity and therefore a special character.

The special feature of the PA PerfectSense Premium Ambiance lacquer surface is the matt-gloss effect, whose touch is emphasised by synchronised texture depths. Again, synchronised with the respective decor image, a very high degree of authenticity of the material reproduction is achieved. The anti-fingerprint property of the mainly matt surface make it suitable for a wide range of applications.

ST20 Metal Brushed gives pearlescent and metallic decors an authentic character by creating the look and feel of finely sanded metal. Even decors without a pearlescent effect, such as U999 Black, are given a certain metallic impression.

The laminate texture ST75 Mineral Satin gives material reproductions a matt and velvety feel. It is particularly effective on a marble look.

The ST76 Mineral Rough Matt is modelled on a flamed and gently rough natural stone surface. It provides a wide variety of stone reproductions, from marble to slate, a visually neutral surface with an authentically rough feel that also conveys a certain robustness to the customer.

The ST78 Mineral Granite laminate texture is characterised by a lively alternation of matt and glossy surfaces, which are simultaneously interrupted by a striking, rough texture. It is laid out over a large area, reflecting its inspiration from nature.

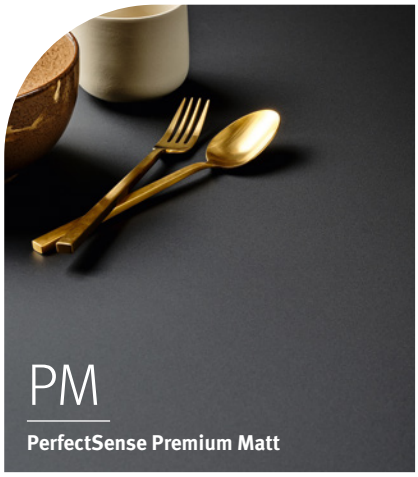

With strong matt-gloss effects, ST87 Mineral Ceramic replicates the striking look and feel of a ceramic tile, making it the perfect surface texture for worktops.

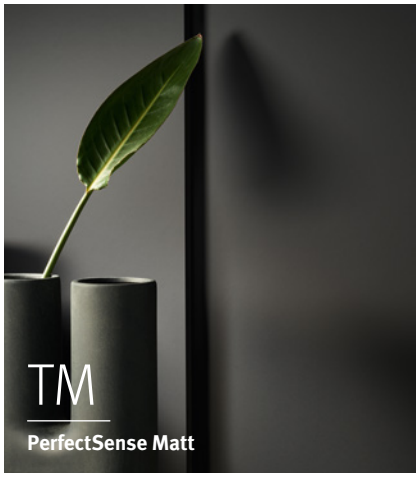

Matt and Gloss

Matt effects are an integral part of modern interior design. All our PerfectSense Matt surfaces have anti-fingerprint property. This makes the matt trend not only visually appealing, but also functional in use since the cleaning effort is reduced.

MATT

The PM PerfectSense Premium Matt lacquered surface gives uni colours a velvety and soft-touch quality, and a unique, surface calm. Anti-fingerprint property perfect the look and feel of this matt surface. PM surfaces are also suitable for horizontal use.

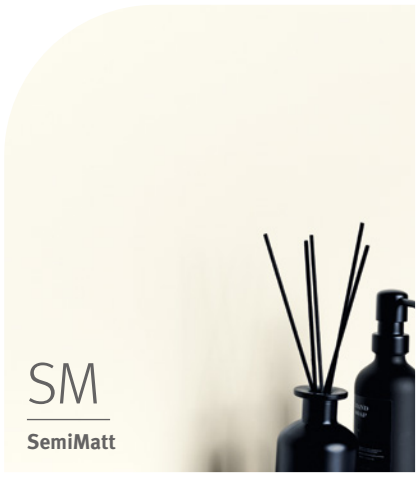

The TM PerfectSense Matt lacquered surface gives uni decors a natural, matt lacquered look with a pleasant velvety-matt feel. Anti-fingerprint property considerably improve usage, thereby enabling other vertical applications in furniture and interior design.

HIGH GLOSS

The amazing depth and surface smoothness of the high-gloss PG PerfectSense Premium Gloss lacquer surface creates a particularly effective elegance.

SMOOTH

The SM SemiMatt surface texture creates a smooth and slightly matt look and feel that is reminiscent of a classic lacquer and thus very aesthetic.

The ST7 Smoothtouch Fine Pearl surface texture is a neutral, usable and rather matt surface.

The ST9 Smoothtouch Matt surface texture gives uni decors, wood and material reproductions a neutral, velvety-matt feel.

In sync with each other:

Flooring and furniture **with the same look.**

A popular interior design theme involves matching the designs of doors, furniture and flooring. Using matching colours and woodgrain patterns creates a coordinated look that enhances the overall aesthetic of the room.
