4 Simple Swaps by EGGER

1

Swap solid oak herringbone flooring for NatureSense Herringbone laminate flooring

With its synchronised pore design and realistic matt finish, NatureSense Herringbone laminate planks provide a cost-effective alternative to solid wood herringbone flooring, eliminating the need for sealing after installation. With a 20-year residential guarantee, this flooring will stand the test of time while retaining traditional, elegant aesthetics.

2

Swap engineered wood planks for NatureSense Aqua laminate planks

NatureSense Aqua laminate flooring provides 24-hour water resistance as standard, making it suitable for use in kitchens and bathrooms as well as living spaces. Enjoy the warmth of wood combined with the durability and practicality of laminate, and with the Aqua CLIC it! locking system, installation is quick and easy.

3

Swap porcelain floor tiles for NatureSense Aqua+ laminate tile designs

NatureSense Aqua+ kingsize tile effect laminate allows you to create the appearance and texture of real tiles, in designs that replicate concrete, marble and stone. This flooring offers an alternative to tiles and has the added benefit 72-hour water resistance, ensuring durability and performance.

4

Swap luxury vinyl planks for AquaDura+ hybrid flooring

A wood-based alternative to LVT, AquaDura+ flooring contains no PVC or plasticisers. Its matt-touch surface creates the look of oiled wood, while its innovative wear layer offers dirt-resistance. It protects against water penetration for up to 72-hours thanks to the Aqua CLIC it! system, and the integrated underlay, made of recycled natural fibres, acts as an integrated sound barrier.
